EDUCATION

2017

SAMAR STATE UNIVERSITY

- Bachelor of Science in Electronics and Communications Engineering

SKILLS

- Python
- Java
- JavaScript
- HTML
- CSS
- React.js
- Node.js
- Express.js
- Django
- Flask
- jQuery
- Bootstrap
- Tailwind CSS
- SQL
- PostgreSQL
- SQLite
- MongoDB

PROFILE

I am an electronics engineer with project management experience, transitioning to web development. I bring five years of expertise in structured cabling and automatic sorting machines. Passionate about technology, I aim to create user-friendly web applications.

WORK EXPERIENCE

Insight Systems International Corporation MARCH 2019- MARCH 2021

Project Engineer

- Performed installation, commissioning, and acceptance, as well as troubleshooting when necessary.
- Coordinated with customers on a daily basis to ensure continuity of activities.
- Installed, commissioned, integrated, troubleshot, and optimized systems according to product manuals and training, avoiding risk-taking that could endanger the systems.
- Prepared materials, manpower, and other resources required for the project.
- Ensured that projects were completed within the deadline.
- Provided written reports and updates on the current status and variations to the client and management.
- Reported problems beyond the scope of the project management to the concerned department or immediate superior.

AMBLISH Technologies, Inc.

June 2021- August 2024

Service Engineer

- Supported and maintained product installations at client sites.
- Performed and provided counsel on diagnosis and repair of equipment and systems (both hardware and software) in liaison with engineers across various offices.
- Maintained an inventory of spare parts and tracked costs incurred for maintenance and repair of deployed systems.
- Contributed to site-specific documentation and quality assurance information.
- Developed and contributed to measurements and reporting of performance indicators for site service objectives.
- Anticipated potential failure modes and proposed changes to design and/or process for ongoing improvement of deployed systems at client sites.
- Ensured customer satisfaction through ongoing interactions with client representatives and system operators.
- Talked clients through a series of actions via phone, email, or chat to resolve technical issues.
- Conducted corrective maintenance work (on-call) for clients requiring site visits to remedy system issues.
- Ensured all issues were properly recorded and tracked until resolution.
- Followed up with clients to ensure their systems were fully functional after troubleshooting.
- Maintained a positive, professional relationship with clients.
